Honda Civic: Why is My Transmission Leaking? An oil leak on the transmission is a big problem. Not only does it cause unsightly spills, but it also affects lubrication inside the powertrain's moving components. To make sure your vehicle stays in top shape, check its parts for wear and damage at regular intervals and replace them in time. When you are in need of a reliable replacement part for your 2001 Honda Civic to restore it to 'factory like' performance, turn to CARiD's vast selection of premium quality products that includes everything you may need for routine maintenance and major repairs. Honda recommends that the transmission fluid be changed at 48000km or 96000 km depending upon service conditions. This change is simply a drain and replace of the nominal 3.3 litres that drains. Honda Civic: How to Replace Clutch and Flywheel. When the clutch fails, its not a matter of if it leaves you stranded; it's when. A damaged clutch does not allow you to engage into gear and will have you calling roadside on a regular basis.
