I changed the valve cover gasket and the oil filter and now when I try to drive the car it doesn't have any power. It starts and idles good (even in neutral), but once I put it in drive and try to go... I have a Mazda Tribute I 06, and since I bought it it shows that one of the doors is open. I tried opening all the door while the car is on but it doesn't make any difference. The alarm won't activate when I use the remote control. It lock but I know the alarm its not on because when the sensor is working right it make a different sound when I look it.
