## Glossary Abbreviations

Pharmacology is the branch of biology concerned with the study of drug action, where a drug can be broadly defined as any man-made, natural, or endogenous (from within the body) molecule which exerts a biochemical or physiological effect on the cell, tissue, organ, or organism (sometimes the word pharmacon is used as a term to encompass these endogenous and exogenous bioactive species). A 7-year-old gelding undergoes sedation for a standing surgery to clean and close a wound on the left forelimb. He is returned to his stall afterward, and several hours later he is observed to have nasal discharge containing feed material. He is also drooling, grinding his teeth, and intermittently ...Otitis media, inflammation of the middle ear structures, is seen in small and large domestic animals, including dogs, cats, rabbits, ruminants, horses, pigs, and camelids. It can be unilateral or bilateral and can affect animals of all ages. Although typically sporadic, outbreaks are possible in herds. Conceptual Glossary of Medical Terms.
