

# Download Americas Forgotten Pandemic The Influenza Of 1918

The 1918 influenza pandemic (January 1918 – December 1920; colloquially known as Spanish flu) was an unusually deadly influenza pandemic, the first of the two pandemics involving H1N1 influenza virus. It infected 500 million people around the world, including people on remote Pacific islands and in the Arctic, and resulted in the deaths of 50 to 100 million (three to five percent of the ...The misnamed "Spanish Flu" pandemic peaked in late 1918 and remains the most widespread and lethal outbreak of disease to afflict humankind worldwide in recorded history. A pandemic (from Greek ??? pan "all" and ????? demos "people") is an epidemic of disease that has spread across a large region; for instance multiple continents, or even worldwide. This may include communicable and noncommunicable diseases.. A widespread endemic disease that is stable in terms of how many people are getting sick from it is not a pandemic. L'influenza spagnola, altrimenti conosciuta come la grande influenza o epidemia spagnola, fu una pandemia influenzale, insolitamente mortale, che fra il 1918 e il 1920 uccise decine di milioni di persone nel mondo, la prima delle due pandemie che coinvolgono il virus dell'influenza H1N1. Essa arrivò ad infettare circa 500 milioni di persone in tutto il mondo, inclusi alcuni abitanti di remote ...
