

Download Cisco 1900 Series Vpn Connection Manual

Overview of the Router. The Cisco 1900 Series Integrated Services Routers (ISRs) are modular routers with LAN and WAN connections that can be configured by means of interchangeable interface cards and internal service modules (ISMs). The series currently consists of the 1905, 1921, 1941, and 1941W (wireless) models. Configuring VPN. A Virtual Private Network (VPN) connection provides a secure connection between two networks over a public network such as the Internet. Cisco 3900 series, 2900 series, and 1900 series ISRs support two types of VPNs: site-to-site and remote access. Remote access VPNs are used by remote clients to log in to a corporate network. Secure services-rich router for a small branch. 1900 Series Integrated Services Routers (ISR) are designed to meet the application demands of today's small branches and to evolve to cloud-based services. They deliver virtualized applications and highly secure collaboration through the widest array of WAN connectivity at high performance that offers concurrent services at up to 25 Mbps.
