Previous Next Return to The Quiz Page Exam Essentials . Description of the Examinations. The General Examination and each specialty examination [Clinical Genetics, Clinical Biochemical Genetics, Clinical Cytogenetics and Clinical Molecular Genetics] are comprised of multiple-choice (one best answer) questions. Clinical cytogenetics is the study of microscopically visible changes in chromosome number or structure and their inheritance. Chromosomes are usually studied in cells that have entered prometaphase or metaphase, when chromosomes are near maximally or maximally condensed. At this stage, each chromosome has
