

Download Food For The Future Agriculture For A Global Age

The food system employs the majority of people in developing countries in both self and wage employment, and will continue to do so for the foreseeable future. The food and agriculture sector extends beyond agricultural production to include storage, processing, distribution, transport, logistics ...The United States Department of Agriculture defines food insecurity as "limited or uncertain availability of nutritionally adequate and safe foods or limited or uncertain ability to acquire acceptable foods in socially acceptable ways." Food security is defined by the USDA as "access by all people at all times to enough food for an active, healthy life."Agriculture is the science and art of cultivating plants and livestock. Agriculture was the key development in the rise of sedentary human civilization, whereby farming of domesticated species created food surpluses that enabled people to live in cities. The history of agriculture began thousands of years ago. After gathering wild grains beginning at least 105,000 years ago, nascent farmers ...Food security is one of the four priority sectors of U.S. Government (USG) development investment in Haiti. The USG's global Feed the Future initiative is supporting the Government of Haiti's (GOH) priorities, working to ensure sustainable growth in the agricultural sector in fertile plains.
