Technical manual contains complete information about the products John Deere, and helps to identify existing and potential problems, perform maintenance and repair problem areas and troubleshooting. I have a John Deere LX280 riding lawn mower. The steering column keeps popping out in the front and I greased it yesterday and it seemed to stay. Later in the day the back end of the steering column detached and I can't get it to stay. Is there a clip or bolt that could have come out? My manual does not show the steering column assembly repair. SOURCE: John Deere Lawn Tractor LX176. Battery discharge. Locate voltage regulator above battery to the left as you sit on machine, its behind frame that supports steering wheel. Once you have found it use a light to shine on harness and follow the brown wire that leads into regulator. The plastic around that wire should not be burnt or showing any other color. The LX series machines had a problem ...
