

# Download Mini Excavator Training Manual

OETIO uses cutting edge simulations in order to accelerate the student's training experience. The mini excavator simulator (Mini-X) is a scaled down version of an excavator that looks and operates like the real thing. The track excavator digs, excavates material in large volumes, and loads material. The excavator is a highly versatile productive piece of equipment used in the construction, mining and forestry sectors. Our purpose built training centre is situated just five minutes from Derry City centre. Our facility includes three training rooms, kitchen and canteen amenities, designated Excavator and Telescopic Handler areas and an indoor Forklift Truck area. Discover John Deere excavators: Compact models, construction-class models, and production-class excavators for all of your excavating needs.
