

Download Painful Diabetic Polyneuropathy A Comprehensive Guide For Clinicians

Neuropathic pain develops as a result of lesions or disease affecting the somatosensory nervous system either in the periphery or centrally. Examples of neuropathic pain include painful polyneuropathy, postherpetic neuralgia, trigeminal neuralgia, and post-stroke pain. The American Diabetes Association (ADA) “Standards of Medical Care in Diabetes” includes ADA's current clinical practice recommendations and is intended to provide the components of diabetes care, general treatment goals and guidelines, and tools to evaluate quality of care. Members of the [ADA Professional Practice Committee][1], a multidisciplinary expert committee, are responsible for ...All the contents and articles are based on our search and taken from various resources and our knowledge in Medical billing. All the information are educational purpose only and we are not guarantee of accuracy of information. Diabetes is a chronic illness that requires continuing medical care and ongoing patient self-management education and support to prevent acute complications and to reduce the risk of long-term complications. Diabetes care is complex and requires that many issues, beyond glycemic control, be addressed. A large body of evidence exists that supports a range of interventions to improve diabetes ...
