

Download Triage For Civil Support Using Military Medical Assets To R

This research on the use of military medical assets to support civil authorities in the event of a terrorist attack inside the United States was begun in spring 2001 and originally focused on only the potential consequences of chemical or biological weapons (CBW) attacks in the United States. This monograph examines the use of military medical assets to support civil authorities in the aftermath of a chemical, biological, radiological, nuclear, or conventional high explosives attack inside the United States. Amazon.com: Triage for Civil Support: Using Military Medical Assets to R (9780833036612): Gary Cecchine, Michael A. Wermuth, Roger C. Molander, K. Scott McMahon ... At the request of the Advanced Systems and Concepts Office (ASCO) of the Defense Threat Reduction Agency (DTRA), RAND conducted this research and analysis based on the likelihood that Department of Defense (DoD) medical assets would be called upon to provide support to civil authorities in the aftermath of a terrorist attack. Originally focused on chemical or biological attacks, it was ...
