

Download Vehicle Extrication Levels I & II Principles And Practice

Vehicle extrication is the process of removing a vehicle from around a person who has been involved in a motor vehicle collision, when conventional means of exit are impossible or inadvisable. A delicate approach is needed to minimize injury to the victim during the extrication. This operation is usually accomplished by using chocks and bracing for stabilization and hydraulic tools, including ...176 Vehicle Extrication Levels I & II: Principles and Practice Take the necessary steps to ensure that all cribbing configurations are structured and uniform, with one on top of the other.

Fire Service Training. Public Service Training provides a vast array of Fire Service and Fire Service related training. PST offers all training approved by the West Virginia State Fire Commission under legislative rule, and literally hundreds of specialized classes for Fire, Rescue, EMS, Law Enforcement, and Emergency Management. The Hi-Lift First Responder Jack is truly a benefit to the fire service, the first time I used this jack I knew this was a product designed by firefighters, for firefighters from the unique foot plate incorporated into the design to the fluorescent markings.
